

The Solar-B Mission and the Forefront of Solar Physics

The Fifth Solar-B Science Meeting

— Dedicated to the Memory of Yutaka Uchida —

November 12–14, 2003

The International House, Roppongi, Tokyo

Solar-B, the successor of Yohkoh (Solar-A) mission, is being developed at ISAS and NAO, Japan, in cooperation with NASA, PPARC and ESA. The main instruments are a 50cm-diameter optical telescope (SOT) with a focal plane package (FPP), a grazing-incidence soft X-ray telescope (XRT), and an EUV imaging spectrometer (EIS). The launch is planned to be 2006 summer. This meeting is the 5th in the series of Solar-B science meetings. It commemorates Yutaka Uchida who passed away last August, and we honor the role he played in making the Solar-B project a reality. This meeting emphasizes basic scientific topics rather than instrumentation, and participation from the entire solar community has been strongly encouraged.

Scientific Organizing Committee:

T. Sakurai (NAOJ, Chair), L.W. Acton (Montana State U.), J.L. Culhane (MSSL), L. Golub (SAO), V. Hansteen (U. Oslo), H.S. Hudson (U.C. Berkeley), K. Kosugi (ISAS/JAXA), K. Shibasaki (NAOJ), K. Shibata (Kyoto U.), A.M. Title (LMATC), S. Tsuneta (NAOJ), T. Watanabe (NAOJ)

Local Organizing Committee:

T. Sekii (NAOJ, Chair), E. Hiei (NAOJ), M. Kubo (U. Tokyo), J. Kuwabara (NAOJ/Sokendai), Y. Sakamoto (U. Tokyo), T. Sakurai (NAOJ), T. Shimizu (NAOJ)

Program

***** November 12 (Wed) *****

Registration, Coffee 09:00 – 09:30

Welcome Message from SOC/LOC 09:30 – 09:40

Session Ia. (Chairperson: T. Kosugi) 09:40 – 11:30

Topic: Solar-B Mission

T. Kosugi 10+5 min

Mission Overview

Toshifumi Shimizu 30+10 min

Optical Telescope and Focal Plane Package (SOT)

R. Kano and M. Shimojo X-ray Telescope (XRT)	20+5 min
H. Hara EUV Imaging Spectrometer (EIS)	20+5 min
Lunch Break	11:30 – 13:30

Session Ib. (Chairperson: A. Title) 13:30 – 15:30

Topic: Convection and Subsurface Magnetic Fields

M. Dikpati Dynamo Models	30+10 min
Y. Fan Dynamics of Emerging Flux Tubes	30+10 min
A. Kosovichev Helioseismology for Solar-B and Joint Investigations with SDO/HMI Project	30+10 min

Coffee 15:30 – 16:00

Session Ic. (Chairperson: J. Wang) 16:00 – 18:00

Topic: Convection and Subsurface Magnetic Fields (Cont.)

T. Sekii SOT Local-Helioseismology Programme	20+5 min
---	----------

Topic: Surface Manifestation of Magnetic Fields

T. Berger Recent Progress in High Resolution Observations	30+10 min
S.K. Solanki and M. Schüssler Small Scale Solar Magnetic Fields	30+10 min

***** November 13 (Thu) *****

Coffee, Poster Setup 09:00 – 09:30

Session IIa. (Chairperson: S. Tsuneta) 09:30 – 11:30

Topic: Surface Manifestation of Magnetic Fields (Cont.)

J. Sanchez-Almeida The Magnetism of the Very Quiet Sun	30+10 min
J. Wang A Weak Component of Solar Magnetism	10+5 min

Topic: Magnetohydrodynamics of the Solar Atmosphere

Å. Nordlund Magnetohydrodynamics of the Solar Atmosphere	30+10 min
---	-----------

K. Shibasaki	10+5 min
A Pumping-Up Mechanism of Mass and Energy from the Photosphere into the Upper Atmosphere	
Lunch Break	11:30 – 13:30
Session IIb.	(Chairperson: G. Vekstein) 13:30 – 15:00
Topic: Magnetohydrodynamics of the Solar Atmosphere (Cont.)	
K. Kusano	30+10 min
Study of Magnetic Helicity in the Solar Corona	
T. Magara	10+5 min
Injection of Magnetic Energy and Magnetic Helicity into the Solar Atmosphere by an Emerging Magnetic Flux Tube	
D. Melrose	10+5 min
Conservation of Both Current and Helicity in Solar Flares	
H. Aurass	10+5 min
Observing the Reconnection Outflow Termination Shock during Solar Flares	
Coffee, Poster Viewing	15:00 – 16:30

Session IIc.	(Chairperson: G. Doschek) 16:30 – 18:00
Topic: Coronal Structures	
J.L. Culhane	30+10 min
X-ray and EUV Observations of Large-Scale Coronal Structures	
L. Golub	10+5 min
XRT DEM Diagnostics	
Tetsuya Watanabe	10+5 min
Electron Densities of High-Temperature Coronal Loops	
J. Singh, T. Sakurai, and K. Ichimoto	10+5 min
Spectroscopic Study of Steady Coronal Structures	
Banquet	18:30 – 20:30

***** November 14 (Fri) *****

Coffee, Poster Viewing	09:00 – 10:00
Session IIIa.	(Chairperson: Tetsuya Watanabe) 10:00 – 11:35
Topic: Heating of the Atmosphere	
M. Carlsson	30+10 min
Chromospheric Heating and Dynamics	
V.M. Nakariakov	30+10 min
Coronal Waves: Coronal Heating and Coronal Seismology	
T. Suzuki	10+5 min
Coronal Heating and Acceleration of the Fast/Slow Solar Wind by Fast/Slow MHD Waves	

Lunch Break	11:35 – 13:30
(Posters must be removed by 13:30.)	
 Session IIIb.	
	(Chairperson: V. Hansteen) 13:30 – 15:30
 Topic: Heating of the Atmosphere (Cont.)	
G. Vekstein, Y. Katsukawa, and S. Tsuneta	20+5 min
Nanoflare Heating of the Corona	
Y. Katsukawa and S. Tsuneta	10+5 min
Properties of Photospheric Magnetic Fields at Footpoints of Hot and Cool Loops	
R. Moore, D. Falconer, J. Porter, D. Hathaway, and Y. Yamauchi	10+5 min
Coronal Heating, Spicules, and Solar-B	
S. Tsuneta and Y. Katsukawa	10+5 min
Coronal Heating with Sweet-Parker Pico-Flares	
 Topic: Large-Scale Coronal Dynamics	
P.T. Gallagher	30+10 min
Large-Scale Coronal Dynamics	
 Coffee	15:30 – 16:00
 Session IIIc.	
	(Chairperson: L. Golub) 16:00 – 17:40
 Topic: Large-Scale Coronal Dynamics (Cont.)	
K. Shibata	30+10 min
MHD Shock Waves in the Corona	
A. Zhukov	20+5 min
Large-Scale Coronal Dynamics Observed by SOHO/EIT	
N. Narukage	10+5 min
Observations of Flare-Associated Waves with Solar-B	
T. Sakurai: Meeting Summary	15 min

Poster Papers

- P1 R. Cameron, A. Vögler, S. Shelyag, and M. Schüssler
The Decay of a Simulated Pore
- P2 H. Isobe
Three-Dimensional MHD Simulation of Convection and Emerging Flux
- P3 T. Miyagoshi, H. Isobe, T. Yokoyama, and K. Shibata
Jet Phenomena in the Solar Atmosphere Caused by Interaction between Emerging Flux and Pre-Existing Coronal Magnetic Fields
- P4 M.S. Wheatland
Nonlinear Force-Free Magnetic Field Configurations
- P5 Debi Prasad Choudhary, K.S. Balasubramaniam, and Y. Suematsu
Asymmetric Stokes-V Profiles at the Penumbral Boundary of a Sunspot
- P6 B.W. Lites, G.B. Scharmer, T.E. Berger, and A.M. Title
Three-Dimensional Structure of the Active Region Photosphere as Revealed by High Angular Resolution
- P7 M. Kubo and Toshifumi Shimizu
Vector Magnetic Field of Moving Magnetic Features around a Well-Developed Sunspot
- P8 B.J. LaBonte, M. Georgoulis, and D.M. Rust
Measuring Magnetic Helicity Transport in Solar Active Regions: The Need for Vector Magnetic Fields
- P9 T. Yamamoto, T. Sakurai, K. Kusano, and T. Yokoyama
Magnetic Helicity Injection and Sigmoidal Coronal Loops
- P10 Y. Sakamoto
Magnetic Helicity, Magnetic Energy, and EUV Variability
- P11 M. Hagino, T. Sakurai, and A. Miyazawa
Phase Relationship between the Activity Cycles of Sunspots and Polar Faculae
- P12 A. Satya Narayanan, R. Ramesh, C. Kathiravan, and E. Ebenezer
Kink Oscillations in the Solar Corona
- P13 Y. Yamauchi, R.L. Moore, S.T. Suess, H. Wang, and T. Sakurai
Macrospicules, Coronal Heating, and Solar-B
- P14 H. Hara and K. Nakakubo
Variation of the X-ray Bright Point Number over the Solar Activity Cycle
- P15 S. Akiyama, G.A. Doschek, and J.T. Mariska
The Relationship between Nonthermal Velocities in Different Temperature Regions of the Solar Lower Transition Region
- P16 M. Shimojo
Derivation of DEM Distribution Using YOHKOH/Soft X-ray Telescope
- P17 S. Ueno, S. Nagata, R. Kitai, and H. Kurokawa
The Features of Solar Telescopes at the Hida Observatory, and the Possibilities of Coordinated Observations with Solar-B

- P18 S. Nagata and SMART Team
 Coordinated Observation by Solar-B and Solar Magnetic Activity Research Telescope (SMART) for Probing the Coronal Loop Heating Mechanism
- P19 T.T. Ishii, S. Nagata, S. Ueno, R. Kitai, and H. Kurokawa with SMART Team
 Studies on the Flare Energy Build-up Process Using Solar-B/Solar Optical Telescope (SOT) and Solar Magnetic Activity Research Telescope (SMART) at Hida Observatory
- P20 S. Masuda
 Coronal Hard X-ray Source Accompanying a Plasma Ejection
- P21 J. Sato
 Statistical Study of Hard X-ray Footpoint Region Observed with YOHKOH
- P22 C.P. Goff, S.A. Matthews, and L.K. Harra
 Relating Magnetic Field Strengths to Hard X-ray Emission in Solar Flares
- P23 Y. Hanaoka
 H α Impact Polarization Observed in a Gradual Flare
- P24 K. Kobayashi, S. Tsuneta, T. Tamura, K. Kumagai, Y. Katsukawa, M. Kubo, Y. Sakamoto, N. Kohara, T. Yamagami, Y. Saito, K. Mori, and G. Kato
 Hard X-ray Spectral Observation of a High-Temperature Thermal Flare
- P25 Y. Litvinenko
 Particle Acceleration Associated with Three-Dimensional Fan Magnetic Reconnection
- P26 Tohru Shimizu
 Slow Shock Formation and Plasmoid Structure in Fast Magnetic Reconnection
- P27 T. Yokoyama
 MHD Simulations of Magnetic Reconnection with Finite-Amplitude Fluctuations
- P28 A. Asai
 Downflow as a Reconnection Outflow
- P29 D.H. Brooks
 Spectroscopic Detection of Magnetic Reconnection Evidence in the Solar Atmosphere with Solar-B/EIS
- P30 D. Shiota, H. Isobe, D.H. Brooks, P.F. Chen, and K. Shibata
 XRT and EIS Observations of Evidence of Magnetic Reconnection
- P31 A.C. Sterling
 Tether-Cutting Energetics of a Quiet Region Prominence Eruption
- P32 S. Yashiro, N. Gopalswamy, E.W. Cliver, D.V. Reames, M.L. Kaiser, and R.A. Howard
 Association of Coronal Mass Ejections and Metric Type II Radio Bursts with Impulsive Solar Energetic Particle Events
- P33 G. Attrill, L.K. Harra, S.A. Matthews, C.A. Foley, and A.C. Sterling
 The Relationship between Prominence Eruptions and Global Coronal Waves
- P34 K. Hori, K. Ichimoto, T. Sakurai, Y. Nishino, and NOGIS Team
 Flare-Induced Coronal Disturbances Observed with Norikura ‘NOGIS’ Coronagraph: A CME Onset
- P35 I. Suzuki and Y. Uchida
 Observation of Two Different Types of CMEs

- P36 J. Kuwabara and Y. Uchida
Investigation of Loop-Type CMEs with 3D MHD Simulations
- P37 Takashi Watanabe, Y. Namiki, H. Adachi, K. Marubashi, and S. Watari
Interplanetary Flux Ropes and their Coronal Counterparts
- P38 W. Unno, M. Yuasa, and H. Shibahashi
Precipitation Diffusion Model of Solar Wind for Sky Brightness Variation
