Bright Hα-Flocculi.

The character figures are assigned on the scale of 0, 1, 2, 3, 4, 5. The numbers refer to the area and intensity, 0 representing absence ore rarity, 5 extreme abundance and intensity of the flocculi.

Bright Hα-Flocculi.

The character figures are assigned on the scale of 0, 1, 2, 3, 4, 5. The numbers refer to the area and intensity, 0 representing absence ore rarity, 5 extreme abundance and intensity of the flocculi.
